

**Lot 14 Emerald Hills Estates**  
**Septic System Options**

1. Borings 1,2,4,5 are suitable for a shallow in-ground system sized at .4 gpd/sqft. System elevation should be in 1.0'- 2.0' below original grade. Dose tank may be required. Drop boxes or distribution box recommended. System to be installed when the ground is dry to prevent smearing of the sidewalls.
