

Lot 16 Emerald Hills Estates
Septic System Options

1. Borings 3,4,8 are suitable for a shallow in-ground system sized at .4 gpd/sqft. System elevation should be in 1.0'- 2.0' below original grade. Dose tank may be required. Drop boxes or distribution box recommended. System to be installed when the ground is dry to prevent smearing of the sidewalls.
2. Borings 1,2,5,6 are suitable for an at-grade system or 6" mound system, due to coarse fragments.

Any questions on your septic system option please call the above number.
